December 31 Last firehorses retired in San Francisco.

Retirement System Members, 1921

On January 3, 1921, the Retirement System came into existence. The first annual report listed 4,672 members and 43 people drawing benefits. So began the legacy of providing New York's dedicated public servants with the pensions they earn and deserve.

Eighty-seven years later, our members are secure in the knowledge that their retirement benefits will be there when they need them most.

September 2008

I am pleased to present the Comprehensive Annual Financial Report (CAFR) for the New York State and Local Retirement System (the System), for the fiscal year ended March 31, 2008. Responsibility for both the accuracy of the data and the completeness and fairness of the report, including all disclosures, rests with the System. All disclosures necessary and required to enable the public and the financial community to gain an understanding of the System's financial activities have been included.

We believe the enclosed financial statements and data are presented fairly in all material respects and are reported in a manner designed to present the financial position and results of the System's operations accurately. Further, this report is intended to provide complete and reliable information as a basis for making management decisions, adhering to and complying with legal provisions, and ensuring responsible stewardship of the System's assets.

The CAFR was prepared to conform with generally accepted accounting principles (GAAP) for governmental units, as set forth by the Governmental Accounting Standards Board (GASB), as well as the reporting requirements prescribed by the Government Finance Officers Association of the United States and Canada (GFOA). GAAP are uniform minimum standards of, and guidelines for, financial accounting and reporting. They are the framework within which financial transactions are recorded and reported, resulting in financial statements that provide comparability between government entities, consistency between accounting periods and reliability of financial statements for both internal and external users.

The System's transactions are reported on the accrual basis of accounting. Sufficient internal accounting controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements and supporting schedules.

The System was awarded a Certificate of Achievement for Excellence in Financial Reporting from GFOA for its CAFR for the fiscal year ended March 31, 2007. The Certificate of Achievement is a prestigious national award recognizing excellence in the preparation of state and local government financial reports. GFOA awards these certificates to those governments whose comprehensive annual financial reports meet or exceed the association's strict criteria. To be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized comprehensive annual financial report whose contents conform to program standards, and which satisfies both generally accepted accounting principles and applicable legal requirements.

The System has received this prestigious award for each of the past four years. We believe that our current report continues to meet the Certificate of Achievement program requirements and are submitting it to the GFOA for consideration again this year.

The System comprises the New York State Employees' Retirement System (ERS), which was established in 1921, and the Police and Fire Retirement System (PFRS), which the New York State Legislature created in 1966. The assets of ERS and PFRS are held in the Common Retirement Fund (the Fund) and managed by the Division of Pension Investment and Cash Management.

With more than one million participants, the System is the second largest retirement system in the nation, and the third largest in terms of asset value. Significantly, while the average public retirement system administers eight plans, the System administers 91.

The System offers retirement benefits for members who reach specific ages or have completed a specified number of years of service, depending on the system and plan in

which they are enrolled. At the end of fiscal year 2007-08, there were a total of 1,035,430 members, retirees and beneficiaries, and 3,021 participating employers.

This letter was also prepared to draw your attention to some of the highlights of the System's operations for the 2007-08 fiscal year, thereby enabling you to gain a reasonable understanding of the System's financial affairs, as well as its internal controls, for this period.

Funding

The System's funding objective is to meet long-term benefit promises through employer contributions that remain level as a percentage of member payroll. Annual employer contributions — which are the greater of a minimum contribution of 4.5 percent of member payroll or actuarial contributions — are determined on an actuarial basis. The System remains well-funded and a detailed discussion of its funding is provided in the Actuarial Section of this report.

Investments

To meet our obligations to pensioners, members and beneficiaries, the Fund's assets are diversified over a number of investments, and a host of different investment strategies are employed to control risk. In the past year, the Fund returned 2.56 percent.

Accounting Practices

My staff is responsible for identifying control objectives relating to the protection of assets and ensuring that all transactions are properly recorded to permit the preparation of financial statements in accordance with generally accepted accounting principles. We are responsible for the design, implementation and maintenance of adequate internal controls to provide reasonable assurance that control objectives are achieved. The internal control system includes the organization plan, the appropriate segregation of duties and responsibilities, sound practices in the performance of duties and personnel with capabilities commensurate with their responsibilities. We believe the internal controls in effect during the fiscal year ended March 31, 2008, adequately safeguard the System's assets and provide reasonable assurance regarding the proper recording of financial transactions.

GASB requires that the System provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of a Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found in the Financial Section immediately following the report of the independent auditors.

Major Initiatives

In 2007, I instituted reforms to improve efficiency, increase transparency and ensure the integrity of the Fund. These reforms will allow us to maintain the Fund's strength and maximize its performance. But more importantly, by adhering to the highest standards of accountability and transparency, our members, pensioners and beneficiaries can be confident that the Fund is being managed wisely and their benefits are secure. We are proud of the steps we have taken toward becoming the most transparent public pension fund in the country.

We are also proud of the progress we have made on other initiatives and programs. Highlights are included in the report from the Deputy Comptroller for the Retirement System.

Acknowledgments

I would like to take this opportunity to express my gratitude to the staff in the Divisions of Retirement Services and Pension Investment and Cash Management. They are instrumental to the operations and financial soundness of the System and without their combined efforts, this report would not be possible. I also wish to recognize and convey my sincere appreciation to members of my advisory councils and committees for their dedicated service, dependability, guidance and commitment to serving the System's members. I appreciate their continued support and trust.

During 2007, we took a fresh look at the goals and duties of this very public pension system and made great strides toward achieving those goals. We look forward to 2008 and continuing the work we have begun.

Sincerely,

Thomas P. DiNapoli

NEW YORK STATE AND LOCAL RETIREMENT SYSTEM Organizational Chart

2008

OVERVIEW OF RETIREMENT OPERATIONS

Report from Deputy Comptroller Kevin F. Murray

As one of the nation's largest retirement systems, our members and pensioners can trust us to deliver on our stated purpose — ensure they will receive their hard-earned retirement benefits and enable them to plan for a financially secure future. We entered into a trust with them from the moment they entered public service, promising to be there for them just as they have been there for New Yorkers. There is no responsibility that we take more seriously.

Each and every day, our staff's driving principle is to do what is best for our members and pensioners. We are committed to putting their needs first, because they are the ones who are giving, or who have given, their all to public service.

And, we want to make a difference in their lives by giving them the tools and resources they need to plan and prepare for the future. We want to be sure they are aware of the services we offer and guidance we can provide on a variety of issues that might affect their benefits. Because participating public employers are critical to our success in achieving these goals, we're always exchanging meaningful information with them, as well, so they can be up-to-date about relevant topics. After all, without the assistance and cooperation of public employers, who we rely on to accurately report information to us, as well as deliver information to our members, we wouldn't be able to provide the best benefits possible to public employees.

What follows is a summary of our efforts to meet our goals during this past fiscal year.

Our Strategic Priorities

Last June, Comptroller DiNapoli announced six agency-wide strategic priorities and charged each division in the Office of the State Comptroller (OSC) with addressing these priorities. By implementing the six strategic priorities, the Retirement System will help further OSC's goal of becoming the finest governmental fiscal operation in the country.

The priorities include: striving for excellence in customer satisfaction; ensuring we reflect the diversity of the people we serve; proactively providing information about the System to employers, members, pensioners and the general public with a goal of finding better ways to promote accountability and transparency; enhancing our education programs to provide customers and staff with a solid foundation in, and a greater awareness of, positive ethical practices; creating a well organized information campaign to increase awareness of the benefits of a well-managed retirement plan; and improving the effectiveness of the services we offer and programs we provide using feedback from customer satisfaction surveys and information from other public retirement systems.

By actively working to help see these goals realized, we are confident we are improving the Retirement System so it can most effectively serve all New Yorkers.

Responding To the Needs of Our Customers

Since one of our six strategic goals is striving for excellence in customer satisfaction, providing accurate, consistent and timely information is of paramount importance to us. We are also committed to being there when our members, pensioners and beneficiaries need us the most.

For example, although most calls we receive are informational in nature, some need immediate attention and require an extra level of compassion and understanding. Following the Labor Day holiday last year, our Call Center's Automated Information Line received a large number of calls from the Buffalo area after the United States Postal Service inadvertently misplaced 191 checks addressed to area pensioners. Our Information Technology Services' Pension Payroll Support Team immediately determined the names and addresses of those pensioners affected. Shortly

thereafter, our Check Control Unit placed stop payment orders on the original checks and issued replacement ones. The Postal Service arranged for overnight delivery, with postal officials personally picking the checks up from our mailroom. Just for good measure, we telephoned those pensioners who were not aware of the situation to advise them about the corrective actions we took.

Obviously, responding in a timely and professional way is important to our customers. Having state of the art technology in place is important, as well. Our Call Center, which is part of our Bureau of Information Services (BIS), receives, on average, 9,000 calls per week. To help us answer these calls more efficiently, in September 2007 BIS installed Business Advocate software. This software automatically routes incoming calls, eliminating time-consuming manual work previously performed by Call Center staff. This change has enabled us to answer more calls and reduce our customers' wait times. In addition, we have had fewer abandoned calls and call backs. Overall, the installation of this software has increased caller satisfaction and improved the quality of our service.

In addition to answering telephone inquiries, BIS is also responsible for ensuring that members can conveniently visit all of our 16 consultation sites. So, after more than six years in midtown, our New York City consultation site moved to 59 Maiden Lane, in lower Manhattan. This location allows us to be closer to the many New York State employees in lower Manhattan and the boroughs of Queens and Brooklyn.

Further, since another of our priorities is making a conscious effort to better service the State's more diverse constituencies, we've made information more accessible to our members whose first language may not be English, translating several of our informational booklets into Spanish. The booklets affected include some of our most widely read publications, all of which can be found on our website.

All of the above contributed to our concerted efforts to offer our members, pensioners and beneficiaries as much access to retirement information as possible. And, though it is impossible to recognize all the individuals on our staff who, on any given day, routinely respond to the needs of our customers in a professional, timely and responsive manner, it's worth noting that this practice is the norm, rather than the exception.

An Employer Focus

A strong relationship with our participating employers is crucial to us. Through our Employer Partnership Initiative, we committed to find ways to make their Retirement System-related work a little easier, as well as provide them with information they want and need.

Over the past year we created a web presentation designed to give both existing employers, as well as those considering participation, a broad understanding of what it means to participate in the System and create expectations of that participation. *What Every Employer Should Know* contains information about the merits of offering a public pension plan, the Comptroller's role as sole trustee of the Common Retirement Fund, the Fund's investment strategies and the impact the Fund's investments have on New York State residents, among others. In addition, the presentation analyzes how contribution rates are determined and how they compare to long-term expected contribution rates. It also discusses factors affecting an employer's total payment and the importance of a funded ratio.

Also, in response to employer requests for more online services, we recently added a new feature to our website—an electronic order form. Employers can use this form to order multiple copies of the various retirement forms and publications they may need. They can fill out the form online and submit it to us electronically. If an employer only needs one or a few copies of a particular form or publication and it is available online, they can print it immediately.

By providing better service to employers, we are providing better service to our members, too. That is the ultimate goal of our Employer Partnership Initiative.

Major Initiatives

Our Redesign Is On The Right Track

For the past several years, we have been taking a close look at the various ways we process our daily work to discover new ways we can do it even better. We created detailed documentation of more than 100 business processes to identify changes we can make now and in the future to improve our service. By redesigning our work processes, we expect to improve customer service and increase our efficiency. But redesigning how we work is just part of the story. We will also install state-of-the-art technology that fully supports our newly redesigned work processes. So over the past year, we continued our preparations to introduce redesigned business processes and a new information system to replace our current computer system.

We also surveyed members and pensioners to determine their customer satisfaction level. For example, after conducting a survey of members who recently applied for loans, we learned that more than 44 percent of respondents downloaded the loan application from our website and two-thirds would have applied online if we offered that service. Responses to this and other surveys we conducted helped us gain a better understanding of our service strengths and opportunities for improvement, and also provided insight into new services our customers want us to provide.

To be a leader among our peers, we felt it wise to see for ourselves how other systems have improved their business processes. Last year we visited the Michigan Office of Retirement Services, the North Carolina Retirement System, the California State Retirement System and Georgia's Teachers Retirement System, among others. We were able to see firsthand how other systems use new technology to automate and support their work, as well as how they prepared for, and managed, a major pension administration system implementation project. The sharing of experiences and best practices will no doubt prove extremely helpful as we continue to develop the future business and technology requirements of the New York State and Local Retirement System.

Retirement Online

Our new self-service application, *Retirement Online*, was launched in 2007. This personalized Internet service permits enrolled members and pensioners to view their own Retirement System information on a secure area of our website. Members can check loan balances, contribution balances and beneficiary designations while pensioners can check the deductions from their latest monthly payments. By giving our members and pensioners secure access to their personal information and, in the future, allowing them to conduct business with us via the Internet, we anticipate that *Retirement Online* will continue to be a very popular program.

Scanning & Imaging

The New York State and Local Retirement System maintains more than two million paper file folders for members and retirees. Since membership in the System continues to be on the rise, storing, accessing and preserving paper records was becoming a formidable task. So, in 2005, we began the transition from paper to electronic records when we launched our Scanning & Imaging initiative. This change addresses our concerns about information degrading and storage limitations, as well as provides greater security for the sensitive information contained in the files.

The pilot program for the Scanning & Imaging project was successfully completed in April 2007, resulting in a system that enables us to scan, store and electronically view membership information. Converting all the folders to electronic images will eventually allow the paper folders to be destroyed. More than 33,000 paper folders have been scanned to date, and we are working on the next phase, called a "Back-File Conversion," to scan all 2.17 million folders into the electronic system.

Notable New Laws Affecting Members and Retirees

World Trade Center Presumption Filing Deadline Extended

Chapter 495 (Laws of 2007) extends by two years, until June 14, 2009, the deadline to file a World Trade Center (WTC) Notice. By filing a notice, eligible members retain the right to file for a WTC Accidental Disability presumption, or convert a service or disability retirement benefit to an accidental disability benefit if they become disabled in the future. It also preserves the rights of certain family beneficiaries to file for an accidental death benefit. Chapters 104 and 93 of the Laws of 2005 provided those brave public employees who participated in the World Trade Center (WTC) rescue, recovery or clean up efforts a presumption that, if they become permanently disabled due to certain qualifying conditions and are unable to perform their jobs, the condition was incurred in connection with the WTC aftermath.

Salary Increase For Special Accidental Death Benefit

Chapter 39 (Laws of 2007) increases the salary used to calculate the special accidental death benefit in cases where the date of death was before 2007. This applies to benefits payable to a surviving spouse and children of certain police and fire personnel.

Maximum Police and Fire Retirement System Service Retirement Benefit Increased

Chapter 625 (Laws of 2007) increases the maximum service retirement benefit for Tier 2 police officers and firefighters. Up to 32 years of service credit can now be used when calculating their retirement benefits. Previously, the maximum was 30 years.

New Way To Purchase Military Service Credit

Chapter 627 (Laws of 2007) allows members to purchase previous or military service credit by pre-tax payroll deduction, if permitted by the System and the Internal Revenue Service.

Comprehensive reports such as this one always afford great opportunities to reflect on the work we are doing. As we look back over the past year, we are motivated by the remarkable progress we've made toward our Redesign, and inspired to find even more efficient and effective ways to do our jobs in the future. Our work so far has laid a solid foundation for what lies ahead of us and enables us to move onward with great anticipation. We look forward to sharing our accomplishments with you again next year.

2008

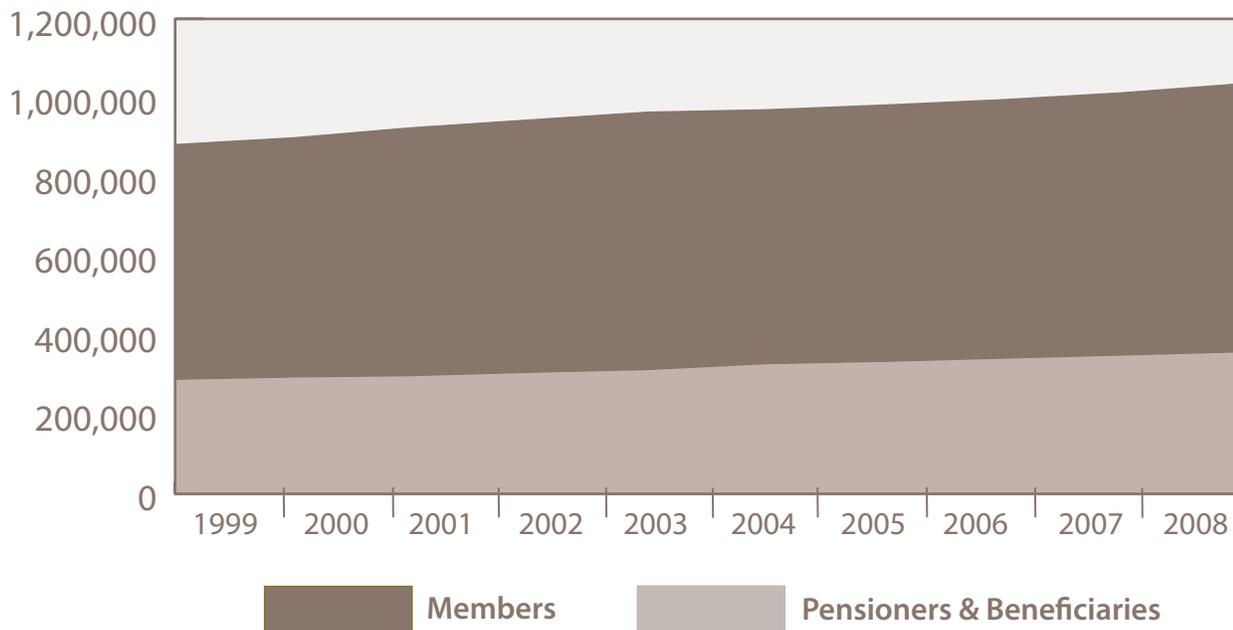

BY THE NUMBERS

Members and Retirees

Overall membership in the System is 1,035,430. This includes 677,321 members and 358,109 retirees and beneficiaries. Both of these numbers continue to climb, with the number of retirees increasing more quickly than members. For example, in 1990, retirees represented 26 percent of the System's members. By fiscal year 2008, that number had increased to approximately 35 percent.

The value of the pension fund's net assets at the end of the fiscal year was \$155.9 billion.

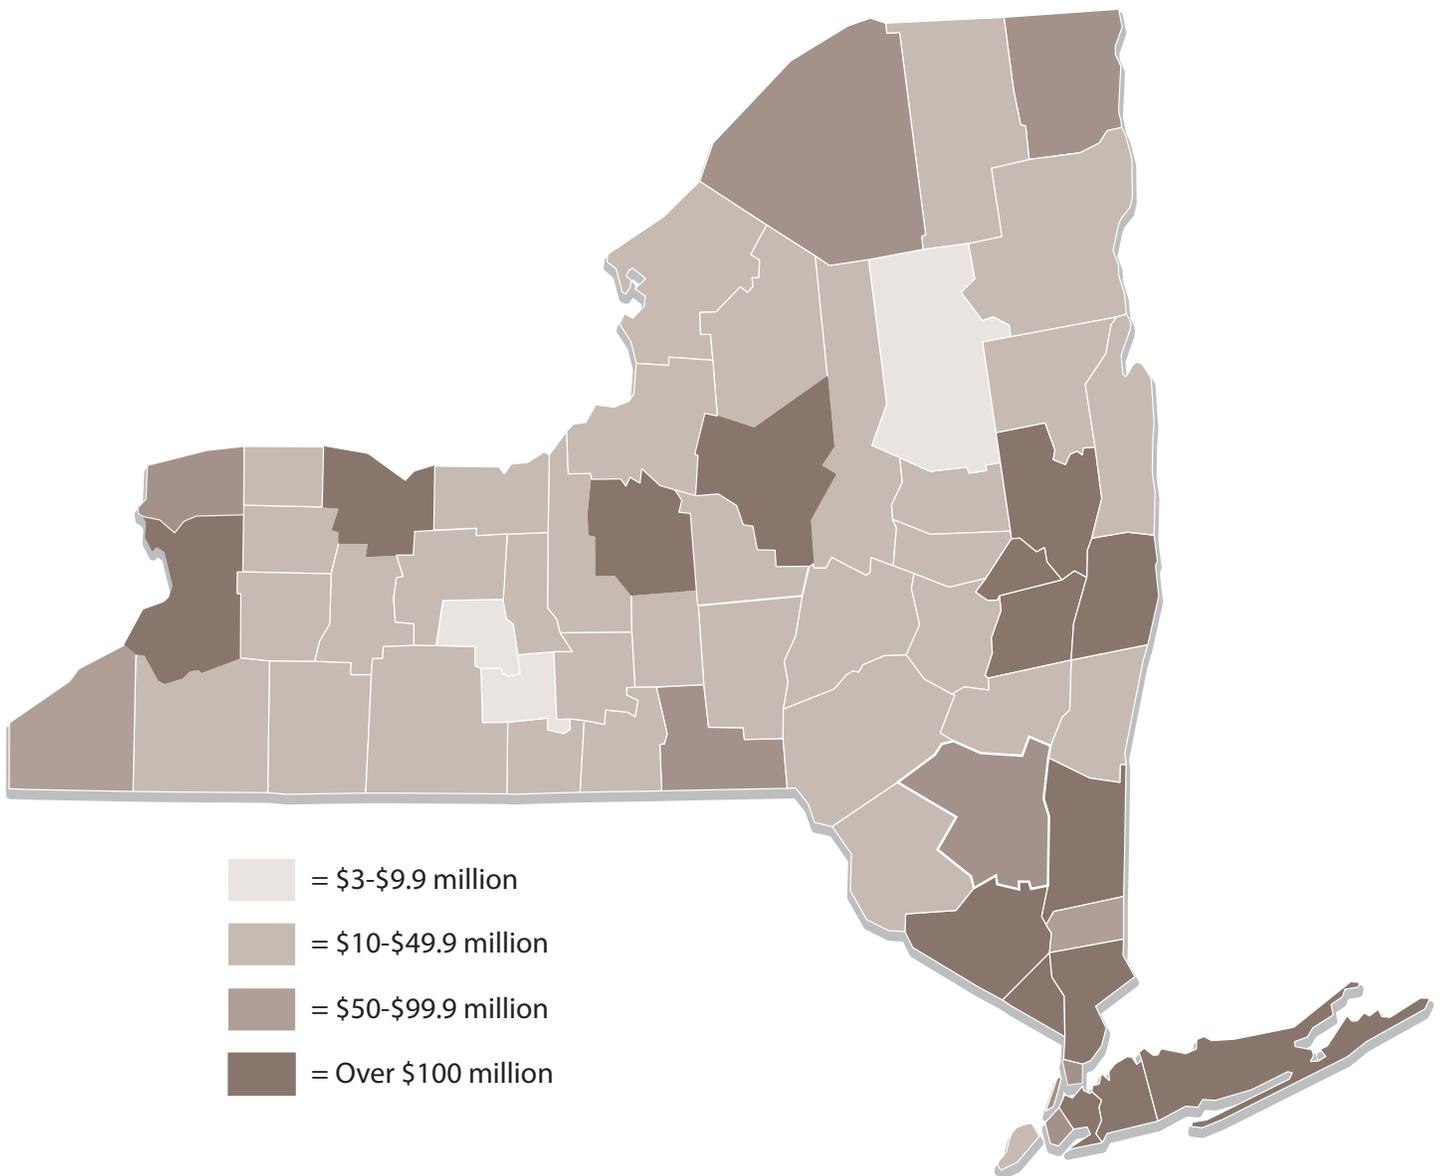

Benefit payments continue to rise, reflecting improvements in final average salaries over the past decades, cost-of-living adjustment (COLA) payments and benefit improvements enacted over the years. For example, in 1999, benefit payments were approaching \$3.5 billion, while this year's payments totaled approximately \$6.9 billion.

2008

RETIREES IN NEW YORK STATE

Of the 358,109 retirees and beneficiaries in the System, 276,112 (77 percent) remain New York State residents. As such, benefit payments surpassing \$5.2 billion this year alone reached the State's communities and businesses, representing the System's greatest impact on the State's economy.

Franklin D. Roosevelt

- January 3** March of Dimes established.
- February 4** Disney's *Snow White and the Seven Dwarfs* released.
- August 18** Thousand Islands Bridge, connecting New York State and Canada, dedicated by Franklin D. Roosevelt.
- November 1** Seabiscuit defeated War Admiral by four lengths in legendary horse race.
- November 8** New York State constitution mandated that retirement benefits cannot be diminished.

A staff member with her modern machine, 1938

On November 8, 1938, New York voters ratified an amendment to the State Constitution stating that "retirement benefits shall not be diminished or impaired."

This constitutional guarantee formed the corner stone of trust that Retirement System members rely on for financial security.

INDEPENDENT AUDITORS' REPORT

To the Trustee of
New York State and Local Retirement System:

We have audited the accompanying statement of plan net assets of the New York State and Local Retirement System (the "System") as of March 31, 2008, and the related statement of changes in plan net assets for the year then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the plan net assets of the System as of March 31, 2008, and the changes in plan net assets for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued a report dated June 30, 2008, on our consideration of the System's internal control over financial reporting and our test of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis and 2008 Required Supplementary Information on pages 31-33 and 46-47 are not a required part of the basic financial statements, but are supplementary information required by the Governmental Accounting Standards Board. This supplementary information is the responsibility of the System's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit such information and do not express an opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the System's basic financial statements. The Additional Supplementary Information on pages 48-50 is presented for purposes of additional analysis and is not a required part of the basic financial statements. This supplementary information is the responsibility of the System's management. The Additional Supplementary Information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introduction, investment, actuarial, and statistical sections of this report have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Deloitte & Touche LLP

2008

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following overview of the financial activity of the New York State and Local Retirement System (the System) for the fiscal year ended March 31, 2008 is intended to provide the reader with an analysis of the System's overall financial position. This Management's Discussion and Analysis should be read in conjunction with the basic financial statements of the System, which follow.

Financial Highlights

- The net assets of the System held in trust to pay pension benefits were \$155.846 billion as of March 31, 2008. This amount reflects a decrease of \$779 million from the prior fiscal year. This change is primarily the result of the net depreciation of the fair value of the investment portfolio.
- The System's funding objective is to meet long-term benefit obligations through member and employer contributions and investment earnings.
- Retirement benefits paid this year totaled \$6.835 billion to 358,109 annuitants as compared to \$6.383 billion to 350,066 annuitants for last year. The increase is due to the number of new retirees.
- Contributions from employers decreased from \$2.718 billion last year to \$2.648 billion this year. The decrease is due to the change in the employer billing rate.
- The System's investments reported a total return of 2.56% for the current year and 12.58% for last year.

Overview of the Financial Statements

- The financial statements consist of the statement of plan net assets, statement of changes in plan net assets, and the notes to the financial statements. The required supplementary information and the additional supplementary information that appear after the notes to the financial statements are not a required part of

the financial statements, but represent supplementary information required by the Governmental Accounting Standards Board.

- The statement of plan net assets reflects the resources available to pay members, retirees, and beneficiaries, at the close of the System's fiscal year. This statement also provides information about the fair value and composition of net assets.
- The statement of changes in plan net assets presents the changes to the System's net assets for the fiscal year, including investment income, net appreciation in fair value of the investment portfolio and contributions from members and employers. Benefits and administrative expenses paid by the System are included under the deductions section of the statement.
- The notes to the financial statements are an integral part of the basic financial statements and provide additional information about the plans of the System. Notes include a plan description, significant accounting policies, contributions, funding policy, reserves to the System, investment risk disclosure, security lending program, federal income tax status, commitments, and contingencies.
- The required supplementary schedules include information about funding progress using the entry age normal funding method to approximate the funding status of the System. The aggregate actuarial funding method, which does not identify or separately amortize unfunded actuarial liabilities, is utilized by the System for funding purposes. In addition, employer contributions for the current year and the previous five years are reported.
- The additional supplementary information includes schedules of administrative expenses, investment expenses, and consulting fees.

Analysis of Overall Financial Position of the System

The purpose of the System's investments is to provide for long-term growth, while also ensuring a reliable cash flow that meets the funding requirements of the near-term pension obligation. To achieve these goals, the investments are efficiently allocated to a variety of asset types and strategies so they meet the current funding needs and future growth requirements of the pension liability. Equity

investments are included for their long-term return and growth characteristics, while fixed income assets are added to the allocation for their ability to control investment risk and provide for a reliable cash flow that meets the funding requirements of the pension payments. Tables 1, 2, and 3 summarize and compare financial data for current and prior year.

Table 1

Statement of Plan Net Assets as of March 31, 2008, as compared to March 31, 2007, follows:

	(In Thousands)			
	2008	2007	Dollar Change	Percentage Change
Assets:				
Investments	\$ 153,877,718	\$ 154,575,646	\$ (697,928)	(0.5)%
Securities lending collateral — invested	27,834,422	24,846,521	2,987,901	12.0
Receivables and other assets	3,775,582	4,091,483	(315,901)	(7.7)
Total assets	185,487,722	183,513,650	1,974,072	1.1
Liabilities:				
Securities lending obligations	27,947,014	24,846,521	3,100,493	12.5
Other liabilities	1,694,839	2,041,886	(347,047)	(17.0)
Total liabilities	29,641,853	26,888,407	2,753,446	10.2
Net assets held in trust for pension benefits	\$ 155,845,869	\$ 156,625,243	\$ (779,374)	(0.5)%

The plan net assets of the System totaled \$155.846 billion as of March 31, 2008, a decrease of \$779 million from the prior fiscal year.

Table 2

Statement of Invested Assets as of March 31, 2008, as compared to March 31, 2007, follows:

Investment Category	(In Thousands)			
	2008	2007	Dollar Change	Percentage Change
Short-term investments	\$ 6,443,059	\$ 8,551,143	\$ (2,108,084)	(24.7)%
Government bonds	26,096,724	23,712,007	2,384,717	10.1
Corporate bonds	10,474,749	9,824,205	650,544	6.6
Domestic equities	58,582,079	65,297,430	(6,715,351)	(10.3)
International equities	24,571,663	24,822,250	(250,587)	(1.0)
Private equities	12,699,376	10,044,806	2,654,570	26.4
Absolute return strategy investments	5,328,266	4,681,324	646,942	13.8
Real estate and mortgage loans	9,681,802	7,642,481	2,039,321	26.7
Total investments	\$ 153,877,718	\$ 154,575,646	\$ (697,928)	(0.5)%

The largest positive changes to the invested assets were in private equities and real estate, which represented 8% and 6% of the total investments, respectively, and collectively increased \$4.694 billion from the previous fiscal year. Domestic equities, representing 38% of the total investments, suffered the largest decrease. The change in the invested assets is primarily attributable to the negative performance in domestic equity markets, which was offset by positive returns in private equities and real estate.

Table 3

Statement of Changes in Plan Net Assets for the year ended March 31, 2008, as compared to the year ended March 31, 2007, follows:

Investment Category	(In Thousands)			
	2008	2007	Dollar Change	Percentage Change
Additions:				
Net investment income	\$ 3,163,728	\$ 17,416,082	\$ (14,252,354)	(81.8)%
Total contributions	3,030,236	3,100,572	(70,336)	(2.3)
Total additions	6,193,964	20,516,654	(14,322,690)	(69.8)
Deductions:				
Total benefits paid	(6,883,034)	(6,431,731)	(451,303)	7.0
Administrative expenses	(90,304)	(79,772)	(10,532)	13.2
Total deductions	(6,973,338)	(6,511,503)	(461,835)	7.1
Net decrease/increase	(779,374)	14,005,151	(14,784,525)	(105.6)%
Net assets held in trust for pension benefits — beginning of year	156,625,243	142,620,092	14,005,151	9.8 %
Net assets held in trust for pension benefits — end of year	\$ 155,845,869	\$ 156,625,243	\$ (779,374)	(0.5)%

The change in net investment income is primarily attributable to the negative change in the value of the domestic equity portfolio. The change in administrative expenses represents increased staff hiring and consultant fees.

Economic Factors and Rates

The Common Retirement Fund (the Fund) returned 2.56% for fiscal year 2007–08. In the US, the sub-prime mortgage situation and subsequent liquidity crisis, coupled with rising commodity prices and concerns about a recession, all contributed to weak and declining equity markets. The Federal Reserve acted to address these issues by lowering short-term interest rates six times for a total of 3% during our fiscal year. This was not enough to help domestic and international equities. Domestic and international equities returned (6.44)% and 0.55%, respectively. The Fund's fixed income portfolio returned 8.56%, while private equities at 24.84% and real estate at 14.75% generated particularly strong returns.

Requests for Information

This financial report is designed to provide a general overview of the System's finances for all interested parties. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the New York State and Local Retirement System, 110 State Street, Albany, New York 12244-0001.

2008

NOTES TO FINANCIAL STATEMENTS

Year Ended March 31, 2008

1. Description of Plans

The Comptroller of the State of New York serves as sole trustee of the Common Retirement Fund (the Fund) and administrative head of the New York State and Local Employees' Retirement System (ERS), the New York State and Local Police and Fire Retirement System (PFRS), and the Public Employees' Group Life Insurance Plan (GLIP). GLIP provides death benefits in the form of life insurance. These entities are collectively referred to as the New York State and Local Retirement System (the System). All net assets of the System are held in the Fund, which was established to hold all net assets and changes in net plan assets allocated to the System. In these statements, GLIP amounts are apportioned and included in either ERS or PFRS.

System benefits are provided under the provisions of the New York State Retirement and Social Security Law (RSSL) and are guaranteed by the New York State (the State) Constitution. Once a public employer elects to participate in the System, the election is irrevocable. The System cannot be terminated and plan benefits cannot be diminished or impaired. Benefits can be reduced for future members only by an act of the State Legislature.

Generally, members of the System are employees of the State and employees of its municipalities, other than New York City.

The ERS and the PFRS are cost-sharing multiple-employer defined benefit pension plans. The System is a component unit of the State and is included in the State's financial report as a pension trust fund.

As of March 31, 2008 and 2007, the number of participating employers for ERS and PFRS consisted of:

	ERS		PFRS	
	2008	2007	2008	2007
State	1	1	1	1
Counties	57	57	4	4
Cities	61	61	61	61
Towns	909	908	206	206
Villages	491	490	378	378
Schools	699	699	0	0
Miscellaneous	777	767	33	33
Total	2,995	2,983	683	683

As of March 31, 2008 and 2007, the System membership for ERS and PFRS consisted of:

	ERS		PFRS	
	2008	2007	2008	2007
Retirees and beneficiaries currently receiving benefits	328,726	321,113	29,383	28,953
Inactive members vested	53,597	51,821	1,807	1,579
Active members	587,522	575,102	34,395	34,131
Total members and benefit recipients	969,845	948,036	65,585	64,663

Membership Tiers — Pension legislation enacted in 1973, 1976, and 1983 established distinct classes of membership. For convenience, the System uses a tier concept to distinguish these groups, generally:

Tier 1 — Those persons who last became members of ERS before July 1, 1973, or PFRS before July 31, 1973.

Tier 2 — ERS — Those persons who last became members on or after July 1, 1973, but before July 27, 1976; or PFRS — those persons who became members on or after July 31, 1973.

Tier 3 — ERS — Generally those persons who are State correction officers who last became members on or after July 27, 1976, and all others who last became members on or after July 27, 1976, but before September 1, 1983.

Tier 4 — ERS — Generally, except for correction officers, those persons who last became members on or after September 1, 1983.

Vesting — Members with five years or more of service are 100% vested.

Benefits —

(1) **Tier 1 and Tier 2**

Most Tier 1 and Tier 2 members are on a plan with a minimum retirement age of 55, which provides for 1.67% of final average salary for each year of service less than 20 years. Generally, the benefit with more than 20 years is 2% of final average salary for each year of service. Tier 2 members retiring between ages 55 to age 62, with less than 30 years of service receive reduced benefits. As a result of Article 19 of the RSSL, eligible Tier 1 and Tier 2 members, whose date of membership is prior to July 27, 1976, will receive an additional month of service credit for each year of credited service they have at retirement, up to a maximum of 24 months.

(2) **Tier 3 and Tier 4**

Except for Tier 3 correction officers, generally the benefit is 1.67% of final average salary for each year of service if the service is less than 20 years. For 20 to 30 years of service, the benefit is 2% of final average salary for each year of service. An additional benefit of 1.5% of final average salary is applied for each year of service over 30 years. A member must be age 62 with five years

of service or at least age 55 with 30 years service to retire with full benefits. Reduced retirement benefits are available if retirement occurs from age 55 to 62.

(3) **Special Plans**

The 25-Year Plans allow a retirement after 25 years of service of one-half of final average salary, and the 20-Year Plans allow a retirement after 20 years of service of one-half of final average salary. These plans are available to certain PFRS members, sheriffs, and correction officers.

(4) **Ordinary Disability Benefits**

Generally, ordinary disability benefits, usually one-third of salary, are provided after ten years of service; in some cases, after five years of service.

(5) **Accidental Disability Benefits**

For all eligible Tier 1 members and Tier 2 ERS members, the benefit is a pension of 75% of final average salary with offset for any workers' compensation benefits received. For Tier 1 and Tier 2 PFRS members, the benefit is a pension of 75% of final average salary with offset for any workers' compensation benefits received. The Tier 3 and Tier 4 ERS benefit is the ordinary benefit with the years-of-service eligibility requirement dropped.

(6) **Ordinary Death Benefits**

Death benefits are payable upon the death, before retirement, of a member who meets eligibility requirements as set forth by law. The first \$50,000 of an ordinary death benefit is paid in the form of group term life insurance. The benefit is generally three times salary. For most members, there is also a reduced post-retirement ordinary death benefit.

(7) **Post-Retirement Benefit Increases**

A cost-of-living adjustment is provided to: (i) all pensioners who have attained age 62 and have been retired for 5 years; (ii) all pensioners who have attained age 55 and have been retired for ten years; (iii) all disability pensioners, regardless of age, who have been retired for five years; and (iv) ERS recipients of an accidental death benefit, regardless of age, who have been receiving such benefit for five years. This cost-of-living adjustment is a percentage

of the annual retirement benefit of the eligible member as computed on a base benefit amount not to exceed \$18,000 of the annual retirement benefit. The cost-of-living percentage shall be 50% of the annual Consumer Price Index as published by the U.S. Bureau of Labor, but cannot exceed 3%.

2. Summary of Significant Accounting Policies

Basis of Accounting — The accompanying financial statements are prepared using the accrual basis of accounting. Revenue is recognized when earned, and liabilities are recognized when incurred. Employer contributions are recognized when due, pursuant to statutory requirements and formal commitments. Member contributions are based on when member salaries are earned and are recognized when due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Investment sales and purchases are recorded on a trade-date basis. The amounts shown on the financial statements are allocated between ERS and PFRS based on each system's equity in the Fund.

Method Used to Value Investments — Investments are reported at fair value. Fair value is defined as the amount that a plan can reasonably expect to receive for an investment in a current sale between a willing buyer and a willing seller.

- Stocks traded on a national or international exchange are reported at current market values.
- Bonds are primarily reported at market values obtained from independent pricing services.
- Mortgages are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments.
- Direct investments in real estate are based on independent appraisals made every three years or according to the fund agreement.
- Real estate partnerships are reported at values provided by general partners. These values are based on discounted cash flows, comparative sales, capitalization rates applied to net operating income, or cost, if none of the preceding fit a property's attributes and strategy.

- Publicly traded private equity investments are valued based on quoted market prices. If not publicly traded, the fair value is determined by the investment manager. Financial Accounting Standards Board Statement No.157, Fair Value Measurements, requires private equity investment managers to value non-publicly traded assets at current fair value, taking into consideration the financial performance of the issuer, cash flow analysis, recent sales prices, market comparable transactions, a new round of financing, a change in economic conditions, and other pertinent information. Fair value is determined using the best information available for a hypothetical transaction at the measurement date, not using forced sale or fire sale pricing.
- The Fund trades in foreign exchange contracts in the normal course of its investing activities in order to manage exposure to market risks. Such contracts, which are generally for a period of less than one year, are used to purchase and sell foreign currency at a guaranteed future price. These contracts are recorded at market value using foreign currency exchange rates.

Member Loan Programs — Members are entitled to participate in a loan program that allows them to borrow up to 75% of their member contributions. Repayment of outstanding amounts is generally made through payroll deductions within five years. The interest rate charged for member loans is fixed at 1% below the actuarial interest rate at the time the loan is granted. The loan rate as of March 31, 2008 was 7%.

Benefits Payable — Benefits payable represents payments due on account of death and retirement on or before March 31, 2008, for which final calculations had not been completed and paid as of that date.

Other Receivables — Other receivables include a promissory note in the amount of \$245.12 million from a real estate investment that is due and payable in 2013.

Other Liabilities — Other liabilities include a cash managed balance, which represents disbursements issued on previous business days, which are funded when presented for payment at the issuing bank. Other liabilities total \$165 million of which \$94 million represents outstanding checks. In addition, tax withholding payments due the Internal Revenue Service total \$50 million.

Use of Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies. These estimates are subject to a certain amount of uncertainty in the near term, which could result in changes in the values reported for those assets in the statement of net assets. Estimates also affect the reported amounts of income/additions and expenses/deductions during the reporting period. Actual results could differ from these estimates.

Capital Assets — Capital assets are capitalized at cost and depreciated on a straight-line basis over an estimated useful life of thirty years.

Recent Accounting Pronouncements — In June 2007, the Governmental Accounting Standards Board (GASB) issued Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*, to enhance the comparability of the accounting and financial reporting of such assets among state and local governments. This Statement requires that all intangible assets not specifically excluded by its scope provisions be classified as capital assets and includes guidance on recognition and amortization of such assets. GASB Statement No. 51 is effective for periods beginning after June 15, 2009. The System is currently evaluating the effect, if any, GASB Statement No. 51 may have on its financial statements.

3. Contributions

Contributions Required — Participating employers are required under RSSL to contribute annually to the System. Annual bills for employer contributions accrue interest at the actuarial interest rate applicable during the year. For fiscal year ended March 31, 2008, the applicable interest rate was 8%.

System Expenses — The System receives an allocation from employer contributions, which are designated by law to cover all non-investment related operating expenses. Investment expenses are offset directly by investment income.

Required Contribution Rates — Tier 3 and 4 members must contribute 3% of their salary. As a result of RSSL Article 19, eligible Tier 3 and 4 employees, with a membership date on or after July 27, 1976, who have ten or more years of membership or credited service with

the System are not required to contribute. Less than 1% of other members are contributory. Members cannot be required to begin making contributions or make increased contributions beyond what was required when membership began.

Contributions Receivable — Employers' contributions receivable are presented net of withdrawals, refunds, advance employer payments, and credits due employers. Receivable amounts from participating employers include \$72.08 million for new plan adoptions and retroactive membership. Receivable amounts from the State for other amortizations total \$33.58 million.

RSSL Chapter 260 of the Laws of 2004 authorized employers to amortize over ten years, at 5% interest, the portion of their annual bill for fiscal year ended 2005 that exceeded 7% of payroll. The amortized amount receivable from the State as of March 31, 2008 is \$333.64 million and from participating employers is \$95.49 million.

RSSL Chapter 260 of the Laws of 2004 authorized employers to amortize over ten years, at 5% interest, the portion of their annual bill for fiscal year ended 2006 that exceeded 9.5% of payroll. The amortized amount receivable from the State as of March 31, 2008 is \$118.69 million and from participating employers is \$26.42 million.

RSSL Chapter 260 of the Laws of 2004 authorized local employers to amortize over ten years, at 5% interest, the portion of their annual bill for fiscal year ended 2007 that exceeded 10.5% of payroll. The amortized amount receivable from participating employers as of March 31, 2008 is \$22.07 million.

4. Funded Status and Funding Progress

Funding Policy — Funding of the System is accomplished through member and employer contributions and the investment earnings on these contributions, according to RSSL. The System uses the aggregate actuarial funding method, which does not identify or separately amortize unfunded actuarial accrued liabilities. As required under GASB Statement No. 50, *Pension Disclosures (an amendment of GASB No. 25 and No. 27)*, following is a schedule of funding progress using the entry age normal funding method to approximate the funding status of the System as of the most recent actuarial valuation date. This 2008 actuarial valuation performed on April 1, 2007, determined employer contributions for the year ending March 31, 2009.

The funded status of the System as of April 1, 2007, the most recent valuation date, is as follows (In Millions):

Actuarial Valuation Date	Actuarial Assets	Actuarial Accrued Liability	Unfunded Actuarial Accrued Liability	Funded Ratio	Covered Payroll	Unfunded Actuarial Accrued Liability as a Percentage of Covered Payroll
	(a)	(b)	(b)-(a)	(a)/(b)	(c)	((b-a)/c)
ERS						
4/1/2007	\$ 121,116	\$ 114,525	\$ (6,591)	105.8%	\$ 22,018	(29.9)%
PFRS						
4/1/2007	\$ 21,379	\$ 20,074	\$ (1,305)	106.5%	\$ 2,825	(46.2)%

The required schedule of funding progress immediately following the notes to the financial statements presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

Significant actuarial assumptions used in the April 1, 2006 and April 1, 2007 valuations to determine employer contributions for the years ended March 31, 2008 and March 31, 2009 were:

Interest Rate	8.0%
Salary Scale	
ERS	5.4%
PFRS	6.7%
Decrement Tables	4/1/00-3/31/05 System's experience
Inflation Rate	3.0%

The actuarial asset value for domestic bonds and mortgages is amortized value. Short-term investments are at market value. Normally, all other investments use a five-year moving average of market values method assuming a 7% rate of expected appreciation. This method immediately recognizes regular investment income (interest and dividends) while phasing in unexpected appreciation/depreciation over a five-year period. It treats realized or unrealized gains (or losses) in the same manner. For fiscal year 2008, the April 1, 2006 valuation reflects a market restart in 2004 and the second year of the phase-in to a full five-year smoothing method. The April 1, 2007 valuation reflects the third year of the phase-in.

Generally, participating employers that have adopted the same benefit plans contribute at the same rate of payroll. The total employer contribution rate as a percentage of salary includes rates for administrative expenses, GLIP, and supplemental benefits. GLIP is a one-year term insurance plan. Consequently, the GLIP rates are determined so as to pay for the current year's GLIP costs. Similarly, the administrative rates are determined so as to pay the current year's administrative expenses. Employers may make

other contributions due to legislation, such as retirement incentives, the ten-year amortization of part of their FYE 2005 and 2006 bill, and deficiency payments, which an employer may incur when joining the System and are payable for up to 25 years. The following average employer contribution rates exclude certain contributions such as the ten-year amortization. The average employer contribution rate for PFRS for fiscal year ended March 31, 2008, was approximately 16.6% of payroll. The average contribution rate for ERS for fiscal year ended March 31, 2008, including incentive contributions, was approximately 9.6% of payroll.

5. System Reserves

The legally required reserves, as covered by provisions of RSSL Section 20, are maintained by the System, are fully funded as of March 31, 2008, and are described below:

- **Annuity Savings Funds** — Funds in which contributions of Tier 1 and Tier 2 members are accumulated, totaled \$17.63 million for ERS and \$23.124 million for PFRS.
- **Annuity Reserve Funds** — Funds from which member contribution annuities are paid totaled \$140.33 million for ERS and \$13.11 million for PFRS.
- **Pension Accumulation Funds** — Funds in which employer contributions and income from the investments of the System are accumulated, totaled \$77.318 billion for ERS and \$13.596 billion for PFRS.
- **Pension Reserve Funds** — Funds from which pensions are paid, totaled \$47.448 billion for ERS and \$9.726 billion for PFRS.
- **Tier 3 and 4 Contribution Funds** — Funds in which Tier 3 and 4 contributions are accumulated. These funds are transferred to the Pension Accumulation Fund at retirement. Funds totaled \$7.412 billion for ERS. PFRS has no Tier 3 and 4 funds.

There are certain other additional funds maintained by the System.

6. Deposit and Investment Risk Disclosure

Custodial Credit Risk for Investments — Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the Fund or are held either by the counterparty or the counterparty's trust department or agent, but not in the name of the Fund.

Equity and fixed income investments owned directly by the Fund, which trade in the United States (US) markets, are held at the Fund's custodian, in separate accounts, in the name of the Comptroller of the State of New York in Trust for the Fund. These securities are typically held in electronic form through the Federal Book Entry System and by the Depository Trust Company (DTC) and its subsidiaries acting as an agent of the Fund's custodian bank. Securities held directly by the Fund, which trade in markets outside the US, are held by a subsidiary of the Fund's custodian bank in the local market, a bank performing custodial services in the local market acting as an agent for the Fund's custodian bank, and in some foreign markets, the securities are held in electronic format by a DTC subsidiary or an organization similar to DTC. Directly held investments include short-term and long-term fixed income and domestic and international equity separately managed accounts. The aforementioned investments have the lowest custodial risk.

Equity investments held indirectly by the Fund via limited partnerships, commingled investment funds, joint ventures, and other similar vehicles are held in custody by an organization contracted by the general partner and/or the investment management firm responsible for the management of each investment organization.

Title to real estate invested in by the Fund is held either by a real estate holding company or a real estate investment fund. Ownership of mortgage assets is documented by the Fund's holding of original mortgage and note documents by the Office of the State Comptroller, Division of Pension Investment and Cash Management.

Custodial Credit Risk for Deposits — Deposits are exposed to custodial credit risk if the deposits are not covered by depository insurance or deposits are uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging institution's trust department or agent, but not in the name of the Fund.

In accordance with existing policies and procedures, the Division of Pension Investment and Cash Management monitors deposit balances for the purpose of determining collateralization levels. Collateral sufficient to cover all uninsured deposits is held at the State's custodial bank.

Interest Rate Risk — The risk that changes in interest rates will adversely affect the fair value of the Fund's fixed income securities.

The price volatility of the Fund's fixed income holdings are measured by duration. Macaulay duration is a measure of a debt investment's exposure to fair value changes arising from changing interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price. In accordance with existing policies and procedures, the Fund attempts to match the duration of the assets with the duration of the retired lives liabilities.

As of March 31, 2008, the duration of the fixed income portfolio is as follows:

Bond Category	Market Value (In Thousands)	Percentage of Bond Portfolio	Macaulay Duration (In Years)
Treasury	\$ 6,571,601	18.0%	11.02
TIPS	13,139,719	35.9	11.81
Agency	2,667,188	7.3	8.59
Mortgage	5,600,215	15.3	4.30
Corporate	8,592,750	23.5	5.24
Total	\$ 36,571,473	100.0%	8.70

Credit Risk — State statutes and the System's investment policies require that corporate fixed income obligations must be investment grade at the time of their acquisition. Long-term bond ratings as of March 31, 2008, are as follows (In Thousands):

Quality Rating	Fair Value	Percentage of Market Value
AAA	\$ 3,271,259	8.9%
AA	2,835,355	7.8
A	3,311,627	9.1
BAA	1,804,022	4.9
CAA	30,400	0.1
Total credit risk debt securities	11,252,663	30.8
US government fixed income securities (not rated)	25,318,810	69.2
Total fixed income securities	\$ 36,571,473	100.0%

Concentration of Credit Risk — The risk of loss attributed to the magnitude of the Fund's investment in a single issuer.

As of March 31, 2008, the System did not hold any investments in any one issuer that would represent 5% or more of total investments. Investments issued or explicitly guaranteed by the US government and pooled investments are excluded from this regulation.

Issuer limits for investments held by the Fund are established for each investment area by RSSL Article 2, Section 13 and Article 4A, Sections 176, 177, and 313 and policy guidelines adopted by the Division of Pension Investment and Cash Management.

Short-term fixed income investments are generally limited to the following investment types maturing in one year or less:

- Obligations for which the full faith and credit of the US is pledged to provide payment of interest and principal.
- Obligations issued by any federal home loan bank or obligations fully guaranteed as to principal and interest by the Federal National Mortgage Association or Federal Home Loan Mortgage Corporation.
- Commercial paper that has the highest rating by two nationally recognized rating services. A maximum of \$500 million of the short-term portfolio may be invested in any one commercial paper issuer.
- Simultaneous purchase and sale of US Treasury obligations may be executed with Primary Government Dealers. A maximum of \$200 million may be invested with any one Primary Government Dealer.

Fixed income investments are generally limited to the following investment types with maturities longer than one year:

- Obligations for which the full faith and credit of the US is pledged to provide payment of principal and interest.
- Obligations payable in US dollars issued by any department, agency, or political subdivision of the US government or issued by any corporation, company, or other issuer of any kind or description created or existing under the laws of the US, any state of the US, District of Columbia or Commonwealth of Puerto Rico, and obligations of Canada or any province or city of Canada provided each obligation shall be rated investment grade by two nationally recognized rating services. The aggregate investment by the Fund in the

obligations of any one issuer shall not exceed 2% of the assets of the Fund or 5% of the direct liabilities of the issuer.

- Interest-bearing obligations payable in US funds that at the time of investment are rated in one of the four highest rating grades by each rating service, which has rated such obligations. The aggregate amount invested in the obligations of any single issuer may not exceed 1% of the assets of the Fund.
- Bonds issued or guaranteed by the State of Israel payable in US dollars, not to exceed 5% of the assets of the Fund.
- Obligations issued or guaranteed by the International Bank for Reconstruction and Development, Inter-American Development Bank, Asian Development Bank, or the African Development Bank.

Foreign Currency Risk — Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The Fund has exposure through direct investments in international equities, international equity commingled funds, international real estate investments, international absolute return strategies, and international private equity investments. All of these investments are externally managed. The Fund permits the managers of direct investments in international equities to use forward currency contracts to manage their exposure to foreign currencies relative to the US dollar. Where the Fund participates in commingled funds limited partnerships, or other investment arrangements, the decision whether or not to use forward currency contracts to manage their foreign currency exposure is left up to the fund manager.

Foreign investments included in the Statement of Plan Net Assets as of March 31, 2008 (In Thousands of US dollars):

	Equities	Cash	Real Estate	Private Equities and ARS Funds	Total
Euro	\$ 5,632,443	\$ 24,745	\$ 147,530	\$ 2,150,418	\$ 7,955,136

The System may enter into forward currency contracts to manage exposure to fluctuations in foreign currency exchange rates on portfolio holdings. The System also enters into forward exchange contracts to settle future obligations. A forward exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. A contract is classified as a forward contract when the settlement date is more than two

days after trade date. Risk associated with such contracts includes movement in the value of a foreign currency relative to the US dollar. The contracts are valued at forward exchange rates and include net appreciation/depreciation in the Statement of Plan Assets. Realized gain or loss on forward currency contracts is the difference between the original contract and the closing value of such contract and is included in the Statement of Changes in Plan Net Assets.

The table below summarizes the fair value of foreign currency contracts as of March 31, 2008 (in thousands of US dollars):

Currency	Forward Currency Contracts	Spot Currency Contracts	Totals
US Dollar	\$ 29,417	\$ (17,673)	\$ 11,744
Euro	(123,663)	817	(122,846)
British Sterling Pound	37,719	18,140	55,859
Australian Dollar	106	(10,718)	(10,612)
Swedish Krona	1,004	(284)	720
Taiwan Dollar		14,574	14,574
Swiss Franc	(28,286)		(28,286)
Japanese Yen	1,146		1,146

Canadian Dollar		(1,196)	(1,196)
Totals	\$ (3,629)	\$ 31	\$ (3,598)

7. Securities Lending Program

Securities Lending — RSSL Section 177-D authorizes the Fund to enter into security loan agreements with broker/dealers and State or national banks. The Fund has designated its master custodian bank (the Custodian) to manage a securities lending program. This program is subject to a written contract between the Fund and the custodian who acts as Security Lending Agent for the Fund. The custodian is authorized to lend securities within the borrower limits and guidelines established by the Fund. Types of collateral received from borrowers for securities loaned are cash, government securities, and federal instrumentalities. The Custodian is authorized to invest the cash collateral in short-term investments that are legal for the Fund. These include domestic corporate and bank notes, US treasuries, obligations of federal agencies, and repurchase agreements. All rights of ownership to government securities pledged as collateral remain with the borrower except in the event of default. Under the terms of the securities lending agreement, the Securities Lending Agent has agreed to hold the Fund harmless for borrower default from the loss of securities or income.

As of March 31, 2008, there were no violations of legal or contractual provisions. The Fund has not experienced any losses resulting from the default of a borrower or lending agent during the year ended March 31, 2008 or in the history of the program.

The Fund lends fixed income, domestic equity, and international equity securities to approved broker/dealers. Collateral for securities loaned equals 102% of fair market value for domestic securities and 105% for international securities. Credit risk associated with the investment of cash collateral pledged by borrowers is mitigated by the maturity restrictions, percentage limitations, and rating requirements for individual asset classes included in the Fund's reinvestment guidelines. The custodian acknowledges responsibility to reimburse the Fund for losses, which might arise from managing the program in a manner inconsistent with the contract. The Fund manages its market rate risk by recording investments at market value daily and maintaining the value of the collateral held by the Fund in excess of the value of the securities loaned.

As of March 31, 2008, the fair value of securities on loan was \$29.219 billion. The associated fair value of the invested collateral was \$29.756 billion of which \$27.834 billion was invested cash collateral. Securities lending obligations at March 31, 2008 were \$27.947 billion. The unrealized loss in invested cash collateral on March 31, 2008 was \$112.592 million, which is reflected in the Statement of Changes in Plan Net Assets, "Net depreciation in fair value of investments."

All open security loans can be terminated on demand by either the Fund or borrower. To provide sufficient liquidity, the policy of the Fund is to maintain a minimum of 10% of collateral in overnight investments. While the Securities Lending Investment Guidelines allow investments up to a maximum of two years, the average term open security loans at March 31, 2008 was 13 days, matching term investments were 39 days and the overall average term to maturity of investment collateral for all loans was 15 days. Approximately 92% of all loans were open loans, while 8% represented direct matching loans.

The collateral pool is valued at market value obtained from independent pricing services.

8. Federal Income Tax Status

Management believes that the System meets the definition of a governmental plan. In the System's communications with the Internal Revenue Service, it has been treated as a qualified plan, and is, therefore, considered exempt from federal income taxes.

9. Commitments

As of March 31, 2008, the System had contractual commitments totaling \$7.372 billion to fund future private equities and \$5.631 billion to fund future real estate investments.

10. Contingencies

The System is a defendant in litigation involving individual benefit payments, participant eligibility, and other issues arising from its normal activities. Management of the System believes there will be no material adverse effect on the basic financial statements as a result of the outcome of these matters.

2008

REQUIRED SUPPLEMENTARY INFORMATION

Schedule of Funding Progress — Year Ended March 31, 2008 (Unaudited)

The System uses the aggregate funding method that does not identify or separately amortize unfunded actuarial liabilities. However, following we have provided a schedule of funding progress using the entry age normal funding method to approximate the funding status of the System. The 2007 actuarial valuation performed on April 1, 2006 determined employer contributions for the year ending March 31, 2008. The 2008 actuarial valuation performed on April 1, 2007 determined employer contributions for fiscal year ending March 31, 2009.

1. The average employer contribution rates for ERS for fiscal years ended 2008 and 2009, including incentive

contributions, were approximately 9.6% of projected payroll and 8.5% of projected payroll, respectively.

2. The average employer contribution rates for PFRS for fiscal years ended 2008 and 2009 were approximately 16.6% of projected payroll and 15.8% of projected payroll, respectively.
3. These average employer contribution rates exclude certain contributions such as the 17-year amortization and the ten-year amortization available for fiscal years ended 2005, 2006, and 2007 bills.

Schedule of Funding Progress — (Unaudited) (In Millions)

Actuarial Valuation Date	Actuarial Assets	Actuarial Accrued Liability	Unfunded Actuarial Accrued Liability	Funded Ratio	Covered Payroll	Unfunded Actuarial Accrued Liability as a Percentage of Covered Payroll

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Trustee of
New York State and Local Retirement System:

We have audited the financial statements of the New York State and Local Retirement System (the System) as of and for the year ended March 31, 2008, and have issued our report thereon dated June 30, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control over Financial Reporting

In planning and performing our audit, we considered the System's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the System's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or a combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

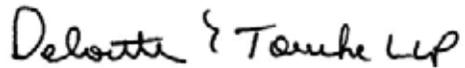

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the System's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of non-compliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of the Trustee and management and is not intended to be, and should not be, used by anyone other than these specified parties.

A handwritten signature in black ink that reads "Deloitte & Touche LLP". The signature is written in a cursive, flowing style.

On April 1, 1967, the Common Retirement Fund was established to hold all the assets of the Retirement System. One year later, the market value of the fund was just over \$3 billion. As of March 31, 2008, the market value stood at \$154 billion.

As sole trustee, the Comptroller is responsible for the oversight and management of the Fund. In addition to his own expertise, the Comptroller employs the expertise of skilled advisors, enabling him to make sound investment and allocation choices. This collective approach strategy has consistently made us one of the strongest, best funded systems in the nation.

2008

OVERVIEW OF INVESTMENTS

Overall Objectives and Performance

The Division of Pension Investment and Cash Management is responsible for the management of the assets of the Common Retirement Fund. The Fund's primary objectives are to provide the means to pay benefits to the System's participants and to minimize employer contributions through an investment program designed to protect and enhance the long-term value of the assets. The Fund's asset allocation policy was constructed to meet these objectives by achieving a maximum level of return consistent with policies on liquidity, diversification and investment risk. Investments in domestic, international and private equity, although historically volatile, provide superior performance and growth characteristics, while less volatile fixed income investments provide predictable cash flow to meet the System's funding requirements and pension obligations.

This year's investment performance reflects uncertainty in the world's financial markets that started with concerns over sub-prime mortgages and tightening credit. This, along with volatile commodity prices and declining home prices, caused consumer confidence to fall. The steady rise in oil prices, to above \$110 a barrel, has had a negative effect on the economy and the consumer in particular. The Federal Reserve responded aggressively to the credit and liquidity crisis by cutting short-term interest rates six times, bringing them down a total of 3 percent from 5.25 percent to 2.25 percent. Housing weakness, retail weakness, liquidity concerns and high commodity prices all contributed to the opinion that the U.S. economy was in, or very near to, a recession. All of these factors weighed heavily on the financial markets.

The Fund returned 2.56 percent for fiscal year 2007-08. For the year, domestic equities, which make up 38 percent of the portfolio, produced negative results with a -6.44 percent return and international equities, which make up 16 percent of the portfolio, were slightly positive with a .55 percent

return. Real Estate and private equity continued to produce strong results with 14.75 percent and 24.84 percent returns, respectively. The core fixed income portfolio returned 8.56 percent and Treasury Inflation Indexed Securities returned 14.65 percent. The sound investment framework provided by the Fund's asset allocation and diversification policies continues to generate growth to secure future benefits while providing cash flow to fund current pension payments.

The investment performance information provided in this section of the Comprehensive Annual Financial Report was calculated using a daily time-weighted rate of return.

Domestic Equities

Representing approximately 38 percent of the Fund's total assets, the aggregate domestic equity portfolio returned -6.44 percent for the year, versus -6.06 percent for the domestic equity market as represented by the Russell 3000 Index, a broad market index. Large capitalization strategies, which account for 82 percent of the domestic equity portfolio, returned -6.02 percent, lagging the S&P 500 benchmark return of -5.05 percent. Medium capitalization strategies and small capitalization strategies both provided relative out performance. Medium capitalization strategies, which account for 10 percent of the domestic equity portfolio returned -6.35 percent vs. the S&P 400 Mid Cap benchmark return of -6.98 percent and small capitalization strategies, which account for 8 percent of the total domestic equity portfolio, returned -10.47 percent vs. the Russell 2000 Index return of -13.00 percent.

During the past year, the Fund's staff maintained a style and capitalization neutral investment strategy for the domestic equity portfolio, consistent with the overarching asset allocation. Within domestic equity, 77 percent is managed in passive strategies, 15 percent is managed in

active strategies and 8 percent is managed in enhanced index strategies. The internally managed S&P 500, S&P 400 and S&P 600 Index Funds continue to provide low cost and efficient exposure to the domestic equity markets. With the expanded use of trade-crossing networks and alternative trading systems, the Fund continued to lower trading costs.

The Fund also continued to use minority and women-owned brokerage service providers when trading for the internally managed assets. For the fiscal year, these brokers accounted for approximately 35 percent of the total commissions. In addition, the Fund's external equity managers used women and minority-owned brokers for approximately 9 percent of their commission total.

Broadening its reach to small and women and minority owned investment firms, the Fund expanded its domestic equity emerging manager program with the addition of 13 new investment mandates, including 8 new investment relationships. This underscores the Fund's commitment to identify smaller, emerging firms that provide opportunity to add value.

International Equities

International and global equity holdings represented approximately 17 percent of the Fund's total assets at the end of the 2008 fiscal year. In aggregate, international equity investments returned 0.55 percent, trailing the 2.15 percent return of the Morgan Stanley All Country World ex United States (ACWI ex U.S.) Index, a broad benchmark of stock market performance. Core developed markets, the largest portion of the Fund's international equity holdings, provided relative out performance, returning -1.26 percent vs. the MSCI EAFE Index return of -2.70 percent. Comprising a smaller portion of the international portfolio, emerging markets equity investments returned 17.41 percent vs. the MSCI Emerging Markets Index return of 21.33 percent and global equity investments returned -11.95 percent vs. the MSCI All Country World Index return of -0.68 percent.

The Fund continued to pursue an international equity strategy for risk reduction and diversification. Investments in international and global markets have proven to be an integral part of the Fund's portfolio because they provide exposure to an important and growing part of the global economy. As of March 31, 2008, investments in developed non-U.S. markets totaled 13.5 percent of the Fund's investments, emerging markets exposure totaled 2.8 percent and global strategies totaled 0.7 percent of

total assets. Within international equities, 80 percent is managed in core international markets, 4 percent is managed in global equity markets and 16 percent is managed in emerging markets.

Fixed Income

The fixed income portfolio is designed to provide a secure funding stream for the Retirement System's pension liabilities and sufficient liquidity to meet monthly pension payments. The Fund accomplishes these goals by investing in both long-term and short-term assets.

The long-term fixed income portfolio provides a reliable stream of income to help address the cash flow needs of the System's pension liabilities and moderates the greater return volatility of the Fund's equity portfolio, while the short-term fixed income portfolio provides liquidity to meet monthly pension fund payments.

U.S. Treasury Securities and Treasury Inflation Protected Securities (TIPS) make up more than half of the long-term fixed income portfolio. The remainder of the long-term portfolio is comprised of government-sponsored agency debentures, corporate bonds, commercial mortgage-backed securities, mortgages, Yankee bonds (dollar denominated bonds issued by foreign companies or governments) and asset-backed securities. The Fund's short-term fixed income portfolio may be invested in high quality commercial paper, U.S. Treasury Bills and Agency Discount Notes.

Approximately 28.1 percent of the total assets of the Fund were invested in the fixed income portfolio at the end of the fiscal year. The Fund's core long-term fixed income portfolio returned 8.56 percent for the fiscal year ending March 31, 2008, which compares favorably to 7.67 percent for the Lehman Brothers Aggregate Bond Index and 8.46 percent for the SSB New Long Term Pension Fund Index. Short-term cash investments returned 4.70 percent. The Fund manages both the long-term and short-term fixed income portfolios internally with the assistance of a fixed income advisor.

The Fund uses 21 broker-dealer firms to execute trades in the long-term and short-term fixed income portfolios. One-third of these trading partners are women and minority-owned firms. Women and minority-owned firms continue to play a central role in the Fund's long-term and short-term fixed income strategy, executing over 23 percent of all long-term trades and 17 percent of all short-term broker initiated trades.

For the past 22 years, the Fund has generated additional income by lending a portion of its assets to qualified counter-parties. Fixed income, domestic equity and international equity securities are available for loan. The Fund's Securities Lending Program earned \$118 million in revenue for fiscal year 2007-08 as compared to \$39 million for the previous fiscal year. The significant increase in earnings is a direct result of the volatility in the credit markets, where the spreads on the reinvestment of the cash collateral to secure the lent securities widened significantly resulting in increased income.

Real Estate

As of March 31, 2008, equity real estate represented 5.78 percent of the total Fund and produced a total return of 14.8 percent. This one-year return reflects a reversion to the historical performance expectations for institutional real estate, compared to the unusually robust returns from the last few years that were enhanced by excessive market liquidity. Nevertheless, the Fund was able to record gains by selling a significant portion of the portfolio at attractive pricing prior to the credit turmoil in the markets. Additionally, the Fund had no exposure to sub-prime mortgage loans.

The real estate portfolio's primary investment objective is to maximize long-term appreciation return on investments, as well as to earn income. Increased risk and illiquidity in the portfolio is offset by the relatively small allocation to real estate of the Fund's total investments. Portfolio risk is further mitigated by diversification by property type, geography, investment strategy and selection of exceptional joint venture partners and managers. The Fund invested selectively with experienced fund managers that have proven acquisition, leasing, financing, management, development and sales track-records through fluctuating economic cycles. The Fund also invested in joint ventures with operating partners, supported by seasoned advisors, a strategy that has yielded strong long-term returns for the Fund during periods of capital illiquidity.

Strategies include investments in under-managed real estate that will be repositioned and re-leased at increased rental rates; commitments to alternative real estate property types such as self-storage which has demonstrated consistent returns even in weak economic cycles; and focus on geographic markets that still exhibit growth characteristics. Moreover, the Fund's international portfolio provides exposure to expanding and recovering

global economies while select domestic markets still are contracting in the current cycle. Nevertheless, significant investment opportunities in the U.S. markets are anticipated and the Fund's strategy will take advantage of such opportunities when they are presented. Examples of these opportunities include investments in real estate that has been built or renovated to meet "green" standards such as LEED-certification and with emerging managers.

Alternative Investments

Private Equity

The Fund's private equity portfolio is designed to provide returns that exceed those of public equities. The added return is accompanied by increased risk and illiquidity; as a result, private equity makes up a relatively small portion of the Fund's total investments. As of March 31, 2008, private equity accounted for 8.3 percent of the Fund's investments and generated a 24.8 percent one-year return.

Private equity generally involves investments in companies that are not publicly traded. Strategies include investments in new companies, which are categorized as venture capital; established companies seeking capital for expansion, which are categorized as corporate finance; special situations funds that invest in specific industries, such as energy and power, or follow other strategies; finally, the Fund's international portfolio includes both venture capital and corporate finance strategies in companies located outside of the United States.

The Fund also invests in funds-of-funds, which are pooled investments in a portfolio of private equity funds. The fund-of-funds strategy has two primary objectives, each of which helps the Fund overcome limited staff resources: to expand the broad diversification objective and to supplement the core private equity portfolio with small funds.

The Fund employs a broadly diversified strategy for its private equity portfolio to reduce risk. Investments are made in a variety of strategies, with a number of different private equity managers and in funds that were initiated at different points in time. This approach reduces the risk to the Fund.

Absolute Return Strategies

The Fund also invests in funds employing absolute return strategies with an objective of generating performance

comparable to that of long-term equities, while being uncorrelated to the equity and fixed income markets, and with volatility similar to fixed income. These funds follow a multi-strategy and multi-manager approach to diversification thereby reducing overall risk level and correlation to the general markets.

As of March 31, 2008, absolute return strategies accounted for 3.5 percent of the Fund's investments and generated a 1.9 percent return.

Other Programs

New York State Mortgage Pass-Through Program

Since 1981, the Common Retirement Fund has purchased New York only mortgage pools through the New York State Mortgage Pass-Through Program. These investments have allowed the Fund to help provide home ownership opportunities for more than 73,800 New York State residents. Since this program's inception, the Fund has invested \$8.4 billion in New York only mortgages.

Under the current structure, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation create and insure pools of single-family mortgage loans originated by traditional lenders, some of which are located in New York State. In the 2007-2008 fiscal year, the Fund purchased \$565 million in mortgages, which assisted approximately 2,900 New Yorkers in purchasing homes.

Affordable Housing Permanent Loan Program

Since 1991, the Fund has played a major role in improving the lives of thousands of residents while strengthening their neighborhoods. Through programs with the Community Preservation Corporation (CPC) and the JP Morgan Chase Community Development Corporation, the Fund has been able to provide moderate income and low-income families across the State with the opportunity to rent affordable housing. By purchasing permanent mortgages, the Fund provides for the production of affordable new multi-family housing and the revitalization of deteriorated or obsolete housing units. Special housing for the State's senior citizens and other constituencies with special needs is also part of the program.

Since inception of this program, 8,524 units have been completed and 3,468 are in the pipeline. The Fund has

committed \$500 million to the CPC program and invested \$429.5 million in mortgages. In fiscal year 2007-08, the Fund invested in affordable housing throughout the State, including Albany, Dutchess, Erie, Fulton, Monroe, Niagara, Onondaga, Ontario, Rensselaer, Saratoga, Suffolk, Ulster and Westchester Counties.

Helping NY/Equity Real Estate Investments

The Fund invests in New York State commercial real estate properties through a mix of investment structures such as joint ventures, commingled funds and club fund investments. The Fund owns shopping centers, office buildings, residential properties and hotels. Through these investment vehicles, the Fund has been able to acquire, develop, release and reposition properties that are in need of upgrading. As a result of such intensive management efforts, property values have been increased.

The Fund invested in the development of a 361-unit rental apartment building that set aside 20 percent of the units for affordable rental housing pursuant to NYC's Housing Preservation and Development's 421-a program. Also, the Fund established an investment fund to make value-added investments in New York State through the Excelsior Real Estate Fund. This fund focuses on multi-family, office, senior housing, retail and other primary property types and is designed to invest in ground-up development, redevelopment and repositioning of commercial property throughout the State. The Fund has also invested with the Phoenix Realty Group's Metropolitan Workforce Housing Fund, which focuses on the development of workforce for-sale housing in the New York State and Tri-State regions.

New York Business Development Corporation (NYBDC) Program

The Fund provides the New York Business Development Corporation with funds to make loans to small businesses for working capital, equipment or real property. NYBDC has a goal of making at least 25 percent of its loans to woman or minority-owned businesses. With its focus on small-business lending, NYBDC can frequently offer more favorable terms than other lenders.

In 2006, the Fund renewed its relationship with NYBDC to provide an additional \$100 million in capital. Since the program began in 1987, NYBDC has made 789 loans totaling \$224.6 million to businesses that employ over

16,000 New Yorkers. During fiscal year 2007-08, NYBDC made 68 loans totaling \$16.9 million.

Financing for Emerging Businesses in New York State

The Fund's private equity portfolio includes investments in 190 New York businesses with a value of \$1.1 billion. This figure reflects only the Fund's share of these investments; the total value of New York companies held by the Fund's partnerships was more than \$12.2 billion as of September 30, 2007 (the most recent data available). A sample of the New York State companies in the private equity portfolio include: NAMIC/VA in Glens Falls, SmartPill in Buffalo, Threadsmith in Binghamton, Application Security in New York City, Bausch & Lomb in Rochester, Applied Nanoworks in Rensselaer, Advion BioSciences in Ithaca, Climax Manufacturing in Lowville, and the Nasdaq Stock Market in New York City.

In 2000, the Fund initiated the New York State Private Equity Investment Program. The Program is designed to provide investment returns consistent with the risk of private equity investing while also expanding the availability of capital for New York businesses. By the end of fiscal year 2007-08, the Fund had commitments to sixteen different private equity managers with commitments totaling \$861 million. The \$861 million in commitments is devoted exclusively to New York investment opportunities. The sixteen managers in the program are:

- Ascend Ventures, a technology venture fund located in New York City;
- Ascent Biomedical Ventures NY, a New York City based venture capital fund focusing on life sciences;
- CSFB New York Co-investment Fund, which makes investments alongside other private equity funds investing in New York State;

Fixed Income	36,571,473	23.8	33,536,212	21.7
Mortgage Loans	772,419	0.5	889,746	0.6
Short-term Investments	6,443,059	4.2	8,551,143	5.5
Total Investments	\$ 153,877,718	100.0%	\$ 154,575,646	100.0%

ASSET ALLOCATION — MARCH 31, 2008* 2008

The Fund diversifies its assets among various classes including domestic and international equity, fixed income, inflation indexed securities, real estate, private equity and absolute return strategies. Asset liability studies, conducted periodically with help from an investment consultant, identify the optimal mix of assets to meet the growth requirements of pension obligations while controlling risk as measured by return volatility.

During the 2007–08 fiscal year, the Fund continued to implement the asset allocation policy adopted in June 2003 and updated in June 2005 and again in September 2006. The Fund has formal rebalancing guidelines which ensure a disciplined process for meeting asset allocation goals, as well as allocation ranges for individual asset classes which minimize unnecessary turnover.

Asset Type	Policy Allocation	Maximum Allocation	Actual Allocation
Equity	70%	75%	71.5%
Domestic Equity	35		38.0
Private Equity	8		8.2
Absolute Return	5		3.5
Real Estate	6		5.8
International Equity	16	18	16.0
Bonds, Cash & Mortgages	22.5%	24.5%	20.0%
Inflation Indexed Bonds	7.5%	9.5%	8.5%

2008

CORPORATE GOVERNANCE

In his capacity as sole Trustee of the New York State Common Retirement Fund (the Fund), Comptroller DiNapoli has a fiduciary duty to protect the Fund's investments for the benefit of the members, beneficiaries and retirees of the New York State and Local Retirement System. Consistent with that fiduciary duty, Comptroller DiNapoli's Bureau of Corporate Governance has continued its tradition of monitoring the corporate behavior and accountability of the Fund's portfolio companies. Since the Fund's investments are made on a long-term horizon, Comptroller DiNapoli seeks to assure to the greatest extent possible that the companies in which the Fund is invested perform in a responsible, sustainable fashion in order to enhance long-term profitability.

Throughout the fiscal year 2007–08, the Bureau of Corporate Governance has continued its work by:

- Engaging corporate management and boards of directors on a variety of governance issues;
- Co-filing shareholder resolutions at six portfolio companies;
- Voting by proxy the Fund's shares for approximately 2,200 companies;
- Lobbying Congress and the Securities and Exchange Commission on climate issues;
- Collaborating with other institutional investors on various shareholder issues; and
- Continuing the Fund's active involvement in membership entities including the Council of Institutional Investors, Ceres, and the Investor Network on Climate Risk.

An important initiative of the Corporate Governance bureau's work this past year was in assisting Comptroller DiNapoli as he developed strategies pertaining to companies that

do business with, or have a presence in, countries that are accused of supporting terror — specifically, Sudan and Iran. As the national debate surrounding this issue increased, Comptroller DiNapoli sought to implement policies that would protect the Fund's investments by reducing exposure, if any, to undue risk arising from geo-political instability.

In May 2007, Comptroller DiNapoli announced that the Fund would implement a three-phased program aimed at increasing pressure on the Sudanese government to end the genocide in Darfur. During Phase 1, the Fund undertook extensive research to identify those portfolio companies that might be engaging in objectionable practices in Sudan. The Comptroller also communicated with the Fund's outside managers, indicating his preference that, when consistent with sound investment strategy, comparable Sudan-free investments take precedence over new investments in Sudan-related companies. During Phase 2, the Fund actively engaged, both individually and collaboratively with other investors, the companies in its portfolio identified as engaging in objectionable practices in Sudan. In Phase 3, Comptroller DiNapoli will develop strategies of divestiture, consistent with his fiduciary duty, to deal with those portfolio companies that, following engagement, have failed to take substantial action to end their objectionable practices in Sudan.

In November 2007, Comptroller DiNapoli unveiled a similar three-phased plan for Iran-related investments to address the unique risks posed by the Iranian president's pro-genocide comments, coupled with that nation's quest for nuclear technology. The Iran strategy specifically targeted companies involved in Iran's energy and defense sectors, paralleling programs enacted by other public pension funds. As with the Sudan-related investments program, in Phase 1, the Fund identified those of its portfolio companies that have business

operations in Iran that are related to that nation's energy or defense sectors. During Phase 2, each company identified in Phase 1 will be asked to provide: a detailed description and history of its business activities in Iran; an explanation as to how these activities are consistent with a sound and prudent long-term investment strategy; and a report on any steps that have been taken to mitigate investment risks posed by its business in Iran. Finally, during Phase 3, Comptroller DiNapoli will evaluate responses received in Phase 2 to determine what steps, if any, these companies have taken to minimize risk to the Fund's investments. With respect to those companies that have failed to mitigate risk, Comptroller DiNapoli, consistent with his fiduciary duty, may withhold additional or new investments, or decline to renew existing investments, or may choose to divest Fund investments.

Additionally, the Corporate Governance Bureau, acting on Comptroller DiNapoli's "green" agenda, continued its support of, and involvement with, the Coalition for Environmentally Responsible Economies (Ceres) and the Investor Network on Climate Risk (INCR). In February, Comptroller DiNapoli served as a convener of, and speaker at, the third Investor Summit on Climate Risk cosponsored by Ceres, INCR, the United Nations Foundation and the United Nations Fund for International Partnership. The Summit brought together investors controlling \$20 trillion and focused on how investors can advance solutions to climate change, with a particular emphasis on the benefits of energy efficiency. The Bureau of Corporate Governance participated with other institutional investors in drafting the "Investor Action Plan" unveiled at the Summit which established goals for investors to incorporate climate change risks and opportunities into investment actions.

Skylab

January 3 George Steinbrenner III purchased the NY Yankees for \$12 million.

May 3 Sears Tower opened in Chicago.

May 14 Skylab, the United State's first space station, launched.

July 1 Tier 2 of the New York State Retirement System created.

August 1 *American Graffiti*, directed by George Lucas, released.

September 20 Billie Jean King defeated Bobby Riggs in landmark tennis match.

Data Entry Unit, 1973

On July 1, 1973, Tier 2 was created, marking the first time any new member group was formed (Tier 3 and 4 were created in later years).

The writing was on the wall. Membership numbers were on the rise. The creation of Tier 2, and those that followed, was a move to contain costs through the restructuring of benefits. The result? Equitable benefits provided to all members at a reasonable cost. It all underscores an absolute commitment to fiscal responsibility.

2008

STATEMENT OF THE ACTUARY

June 2008

As the actuary for the Employees' Retirement System (ERS) and the Police and Fire Retirement System (PFRS), it is my duty to ensure that the New York State and Local Retirement System (the System) properly funds the retirement benefits of members, retirees and beneficiaries in order to ensure that adequate assets are being accumulated to pay benefits as they become due. The System has a funding objective of employer contributions that, over time, are a level percent of payroll.

We annually perform actuarial valuations which determine the annual contributions required of employers. A valuation relies on data for current active and retired members and beneficiaries as of a given date, called the valuation date. Some of the required data to perform a valuation for active members includes dates of birth, salary and credited service. For retired members and beneficiaries, dates of birth, monthly benefits and benefit options are some of the required data elements. In preparation for the valuation, we extensively validate the System's data by running reasonableness tests and account for every individual on a year-to-year basis. Also, we review the information contained in the financial statements.

For active members, the valuation projects expected benefits at retirement, death and withdrawal based on estimated pay and service, as well as the member's plan benefit formula. For retirees, the valuation determines the present value of payments expected to be made for the retiree's and beneficiary's lifetimes.

Since benefit security is the System's primary objective, all obligations, rates of interest and other factors must be determined on the basis of reasonable actuarial assumptions and methods. The types of assumptions that must be made include both demographic (rates of employee mortality, disability, turnover and retirement)

and economic (interest rates, inflation and salary growth). Therefore, in their calculations, actuaries must make assumptions about these uncertainties.

The actuary performs annual experience studies, ascertaining how closely the System's experience is conforming to the assumptions used. If significant differences occur that the actuary believes may indicate permanent shifts, the actuary may recommend assumption changes to reduce the expected differences.

The System retains an external auditor to independently review its financial records every year. Furthermore, an Actuarial Advisory Committee meets annually to review the actuarial assumptions and the results of the actuarial valuation. The System also engages the services of an outside actuarial consultant to perform a review every five years; similarly, every five years, the System is audited by the New York State Department of Insurance. Lastly, the Comptroller of the State of New York, in his role as sole trustee of the System, established an Office of Internal Audit to help fulfill his fiduciary objectives.

There were no significant benefit improvements enacted during fiscal year (FY) 2007. The April 1, 2006 valuation for determining 2008 employer bills was performed under my direction and supervision, using the assumptions recommended by me and adopted by the Comptroller as of April 1, 2006.

The April 1, 2007 valuation is the latest actuarial valuation completed. In FY 2008, which ended March 31, 2008, legislation was enacted which increased benefits for members of the New York State & Local Police and Fire Retirement System with more than 30 years of service. Actuarial assumptions were modified from the previous year for members covered by local 20-year retirement plans.

Our assumptions and methods meet the GASB 25 standards and a summary is included later in this section. I am responsible for all of the valuation results and other actuarial calculations contained in this report. I prepared the Schedule of Funding Progress but, while I prepared the employer contribution rates that determined the 2008 employer billing, I did not prepare the Schedule of Employer Contributions.

On the basis of the foregoing, I hereby certify that, to the best of my knowledge and belief, this report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial practices, which are consistent with the principles prescribed by the Actuarial Standards Board, as well as the Code of Professional Conduct and Qualification Standards for Public Statements of Actuarial Opinion of the American Academy of Actuaries, of which I am a member.

A handwritten signature in cursive script that reads "Teri E. Landin".

ACTUARIAL FUNDING AND VALUATION

Actuarial Funding

An actuarial funding method is a procedure for allocating the costs of a retirement system to particular time periods. It does not determine how much a system will ultimately cost; rather, it determines that portion of the estimated total cost that is to be allocated to a particular year.

For 70 years, the actuarial funding method used by the System was the aggregate method (AGG). Then, Chapter 210 of the Laws of 1990 changed the funding method to a modified projected unit credit (PUC) method beginning in FYE March 31, 1991 (referred to as fiscal year 1991 here). This law was challenged and the challenge was upheld by the Supreme Court. On appeal, both the Appellate Division and the Court of Appeals unanimously agreed with the Supreme Court. These decisions allowed the Comptroller to return to the aggregate funding method, beginning with the 1995 fiscal year. To ease the transition in ERS, i.e., to prevent budget crises among participating employers, the Comptroller devised a plan to phase-in non-GLIP (New York State Public Employees' Group Life Insurance Plan) rates beginning in the 1995 fiscal year when the rates were zero. The rates increased by 1.5 percent per year until 1999, when the transition would cease. However, due to excellent investment gains and favorable experience, almost all ERS employer bills were below the transition rates in 1997, and in 1998, all were below the transition rates, so the transition ceased in 1998.

Actuarial Valuation

At the beginning of the fiscal year, the Actuary, by law, determines the actuarial assets and liabilities. The actuarial valuation is important since it determines each year's employer contributions. Chapter 49 of the Laws of 2003 mandates that the actuarial valuation undertaken on the first day of a fiscal year be used to determine contribution rates for the next succeeding fiscal year.

Each valuation gives a long-term picture of the System currently, and over the coming years. In this, it differs markedly from the

March 31, point-in-time snapshot of the System provided by the Financial Statements. The two measurements serve different purposes and use different techniques.

Two examples help make this clear:

- The actuarial assets for valuation purposes include the current value of all the future contributions employers and employees will make on behalf of current members. The Financial Statement balance sheet asset figure includes only contributions paid or incurred through this fiscal year.
- The actuarial assets smooth out the ups and downs of common stock performance by using a multi-year smoothing procedure. Techniques like this are widely practiced and professionally recommended to protect employers from volatile contribution rates. The Financial Statements, on the other hand, simply present market values of assets on the last day of the fiscal year.

Aggregate Actuarial Funding Method

Actuarial liabilities are the current values (called the actuarial present values) of the benefits the Retirement System expects to pay to current members, pensioners and beneficiaries. The actuarial present value of benefits is calculated by projecting the amount of future retirement, death and disability benefits (based on past and future service) to be paid and then discounting for interest earnings, employee turnover and other contingencies.

The actuarial present value of the contributions that employers must make to the System to fund the projected benefit payment is equal to the actuarial liabilities, minus the actuarial value of present assets.

Under the aggregate funding method, the difference between the actuarial liabilities above and the actuarial value of present assets is funded as a level percentage of salary over the future working lifetimes of current members.

ELEMENTS OF THE ACTUARIAL VALUATION 2008

Actuarial Assumptions

The actuarial assumptions for Fiscal Year Ended 2008 were adopted effective April 1, 2006. These assumptions and their predecessors are shown below. All assumptions presume ongoing Systems:

Fiscal Year Ended 3/31		Salary Scale*		Interest Rate	Multiple-Decrement Tables Based on Systems'
1987-88	Inflation Productivity & Merit	5.0% <u>2.3%</u> 7.3%		8.00%	4/1/81-3/31/86 experience
1989-92	Inflation Productivity & Merit	5.0% <u>2.0%</u> 7.0%		8.75%	4/1/81-3/31/86 experience
1993-96	Inflation Productivity & Merit	5.0% <u>2.0%</u> 7.0%		8.75%	4/1/86-3/31/91 experience
		ERS	PFRS		
1997-98	Inflation Productivity & Merit	4.75% <u>1.25%</u> 6.00%	4.75% <u>1.75%</u> 6.50%	8.50%	4/1/90-3/31/95 experience

*This is an approximate value. Salary scales vary by age and plan and are based on each System's experience.

Selected Actuarial Assumptions used in the April 1, 2006 Valuation

These illustrations are used to determine the number of people we anticipate will be dying, retiring, becoming disabled, withdrawing, etc. Demographic assumptions below show central rates of decrement per 10,000 members, not necessarily probabilities. Assumptions are computed by the Actuary and adopted by the Comptroller. They are based on recent member experience.

Actuarial Value of Assets

Most of the assets of the ERS, PFRS, and GLIP are pooled in the Common Retirement Fund for investment purposes. The actuarial asset values for bonds and mortgages are amortized values. Short-term investments are at market value. Normally, all other investments (stocks, commingled funds, real estate, business investments, etc.) use a five-year moving average of market values method assuming a 7 percent rate of expected appreciation. For fiscal year 2008, the April 1, 2006 valuation reflects a market restart in 2004 and we are in the second year of the phase-in to a full five-year smoothing method.

The GLIP values investments at market value. For fiscal year 2008, the April 1, 2006 valuation of the System and Insurance Plan, the difference between market and actuarial value of smoothed investments, was:

	Investment (millions)
Market Value	\$ 140,453
Actuarial Value	129,735
Difference	(\$ 10,718)

Administrative Expenses

The cost of administering the System is borne by the State and local employers on a current disbursement basis.

Group Life Insurance Plan (GLIP)

GLIP provides for up to \$50,000 of member and certain post-retirement death benefits to be paid as life insurance. All benefits provided are on a one-year term insurance basis. Participating employers are billed each year based on the aggregate of anticipated claims for the plan year. Premiums are set so that the reserve will, at its lowest amount during any year, be approximately equal to payables. Payables is an estimate of the amount of claims currently being processed, plus claims incurred but not yet reported.

Deficiency Costs

An employer may also have a deficiency contribution. When a new employer joins a System, any past service liability is paid for by separate annual payments over a period of up to 25 years. These payments are not affected by the funding method.

Rate and Contribution Comparability

For comparability, unless stated otherwise, rates and contributions assume a payment date of February 1 before the fiscal year end. Presenting the State rates and contributions as of this payment date provides for comparability of State and local government rates and costs.

ACTUARIAL VALUATION BALANCE SHEETS 2008

Used to determine employer contributions for the fiscal year ending March 31; in millions of dollars, as calculated April 1, 2005 and April 1, 2006.

LOCAL GOVERNMENT EMPLOYERS 2008

Final Contribution Rates For Select Plans

For the fiscal year ending March 31, 2008, assuming a February 1, 2008 payment.

All rates exclude any contribution rates due to amortization payments, prior years' adjustments, deficiency costs, retirement incentive programs and certain benefits electable by local governments, such as credit for unused sick leave or one-year final average salary. All rates include Group Life Insurance.

CONTRIBUTION RATE TREND 2008 FOR LOCAL GOVERNMENTS

Rates, prior to 2006, are based on a payment date of December 15. Beginning in 2006, the rates are based on a February 1 payment date. Each rate is applied to the salary of members covered by that particular plan. Rates were calculated under the aggregate method. All rates include Group Life Insurance and administrative rates.

Actual costs borne by employers are shown in the Statistical Section.

EMPLOYER CONTRIBUTIONS 2008

Contributions here may differ from those appearing elsewhere in the Actuarial Section because this section deals only with the contributions attributable to the single year shown. Actual contributions may include adjustments due to previous years, such as amortization payments/credits and reconciliation of other years' bills. In addition, in 2005 and 2006, employers could amortize a portion of their contributions. The following amounts show their total obligation. The contributions and average rates below include normal, administrative, Group Life Insurance, incentive and deficiency contributions.

HISTORICAL TRENDS 2008

The State is obligated to pay its bill on March 1, one month before the end of the fiscal year. However, since 1995, the State has paid its bill prior to this March 1 deadline. Through 2004, local employers paid their bills by December 15, three and one-half months before the end of the fiscal year. Beginning in 2005, the payment date for local employers was changed to February 1.

Trends in Employer Contributions

CHANGES IN CONTRIBUTIONS 2008

Yearly, the System's experience in many areas (employee salary growth or decrease, investment return, legislative enactments of benefits) is assessed and quantified. Each element exerts an increasing, decreasing or neutral pressure on contributions to be charged for that year.

Analysis of Changes (by source)

Experience during one fiscal year produces the increase or decrease in contributions for the following year.

(a) For 2005, this amount is the investment loss relative to the minimum contribution of 2004.

(b) This is an estimated figure. Minor adjustments, mostly salary-related, result in the final contribution figure for the year as shown in the Contributions Billed column.

SOLVENCY TEST 2008

The System is funded in accordance with the aggregate method. The following solvency test is one means of checking the System's funding progress. In this test, the System's actuarial value of assets is compared to: (1) member contributions on deposit, (2) the liabilities for future benefits to persons who have retired and (3) the employer financed liabilities for service already rendered by active members. The accrued liabilities in this chart are calculated in accordance with the entry age normal method.

Valuation Date	Accrued Liability				Actuarial Assets	Portion of Actuarial Accrued Liabilities Covered by Actuarial Assets		
	Member Contributions (1)	Retiree (2)	Active (3)	Total (1) + (2) + (3)		(1)	(2)	(3)

Nelson Mandela

Vision and commitment.

January 18 Martin Luther King Jr. Day observed in all 50 states for the first time.

April 30 World Wide Web created.

May 17 Intel's new Pentium processor unveiled.

June 7 Groundbreaking for the Rock and Roll Hall of Fame.

November 16 New York State Retirement System funding method affirmed.

December 10 Nelson Mandela awarded Nobel Peace Prize.

Early days of the call center, 1993

On November 16, 1993, the State Court of Appeals affirmed that the aggregate funding method is the best way for the System to meet its obligations and ensure that assets adequate to pay benefits are accumulated.

As of April 1, 2007, the System was fully funded with assets sufficient to cover more than 105 percent of projected obligations. Since a reported 77 percent of public pension systems in the U.S. are underfunded, our ratio is proof there really is **Strength in Numbers**.

*Includes employer premiums to Group Term Life Insurance Plan.

2008

NOTES TO 20-YEAR SUMMARY

- * Combined Systems unless noted; \$ in millions; data as of March 31 fiscal year end.
- (a) Includes active members and inactive members identified with their last employer.
- (b) Tier 3 and 4 membership statistics are combined.
- (c) Total does not include Employee Contributions Refunded or Other Benefits found in the Financial Statements.
- (d) Beginning in the 2006 fiscal year, all rates assume a February 1 payment date prior to the close of the fiscal year. Previous years assume rates based on a December 15 payment date. Contributions include normal, administrative, retirement incentive and deficiency costs.
- (e) Investments for 1995 and later years are shown at (and rate of return is calculated on) market value as required by GASB 25, which the System adopted that year. Pre-1995 fixed income investments are shown at book value, all others at market. Pre-1995 rates of return also reflect this valuation.
