*NOTES: University of Maryland Center for Environmental Science (UMCES) is an educational institution subject to the federal cost principles of 2 CFR 200, required to maintain records by percentage of effort not hours. For proposal purposes only, a 40 hour workweek was used here to convert the percent of time into hours. UMCES does not maintain hourly records, does not payemployees on an hourly basis, and does not certify effort on an hourly basis. Amount payable includes salary and associated fringe benefits. These hours are estimates based on the original proposal. Due to NY contracting delays on this project, hours will be billed based on actual costs for the tasks completed.
